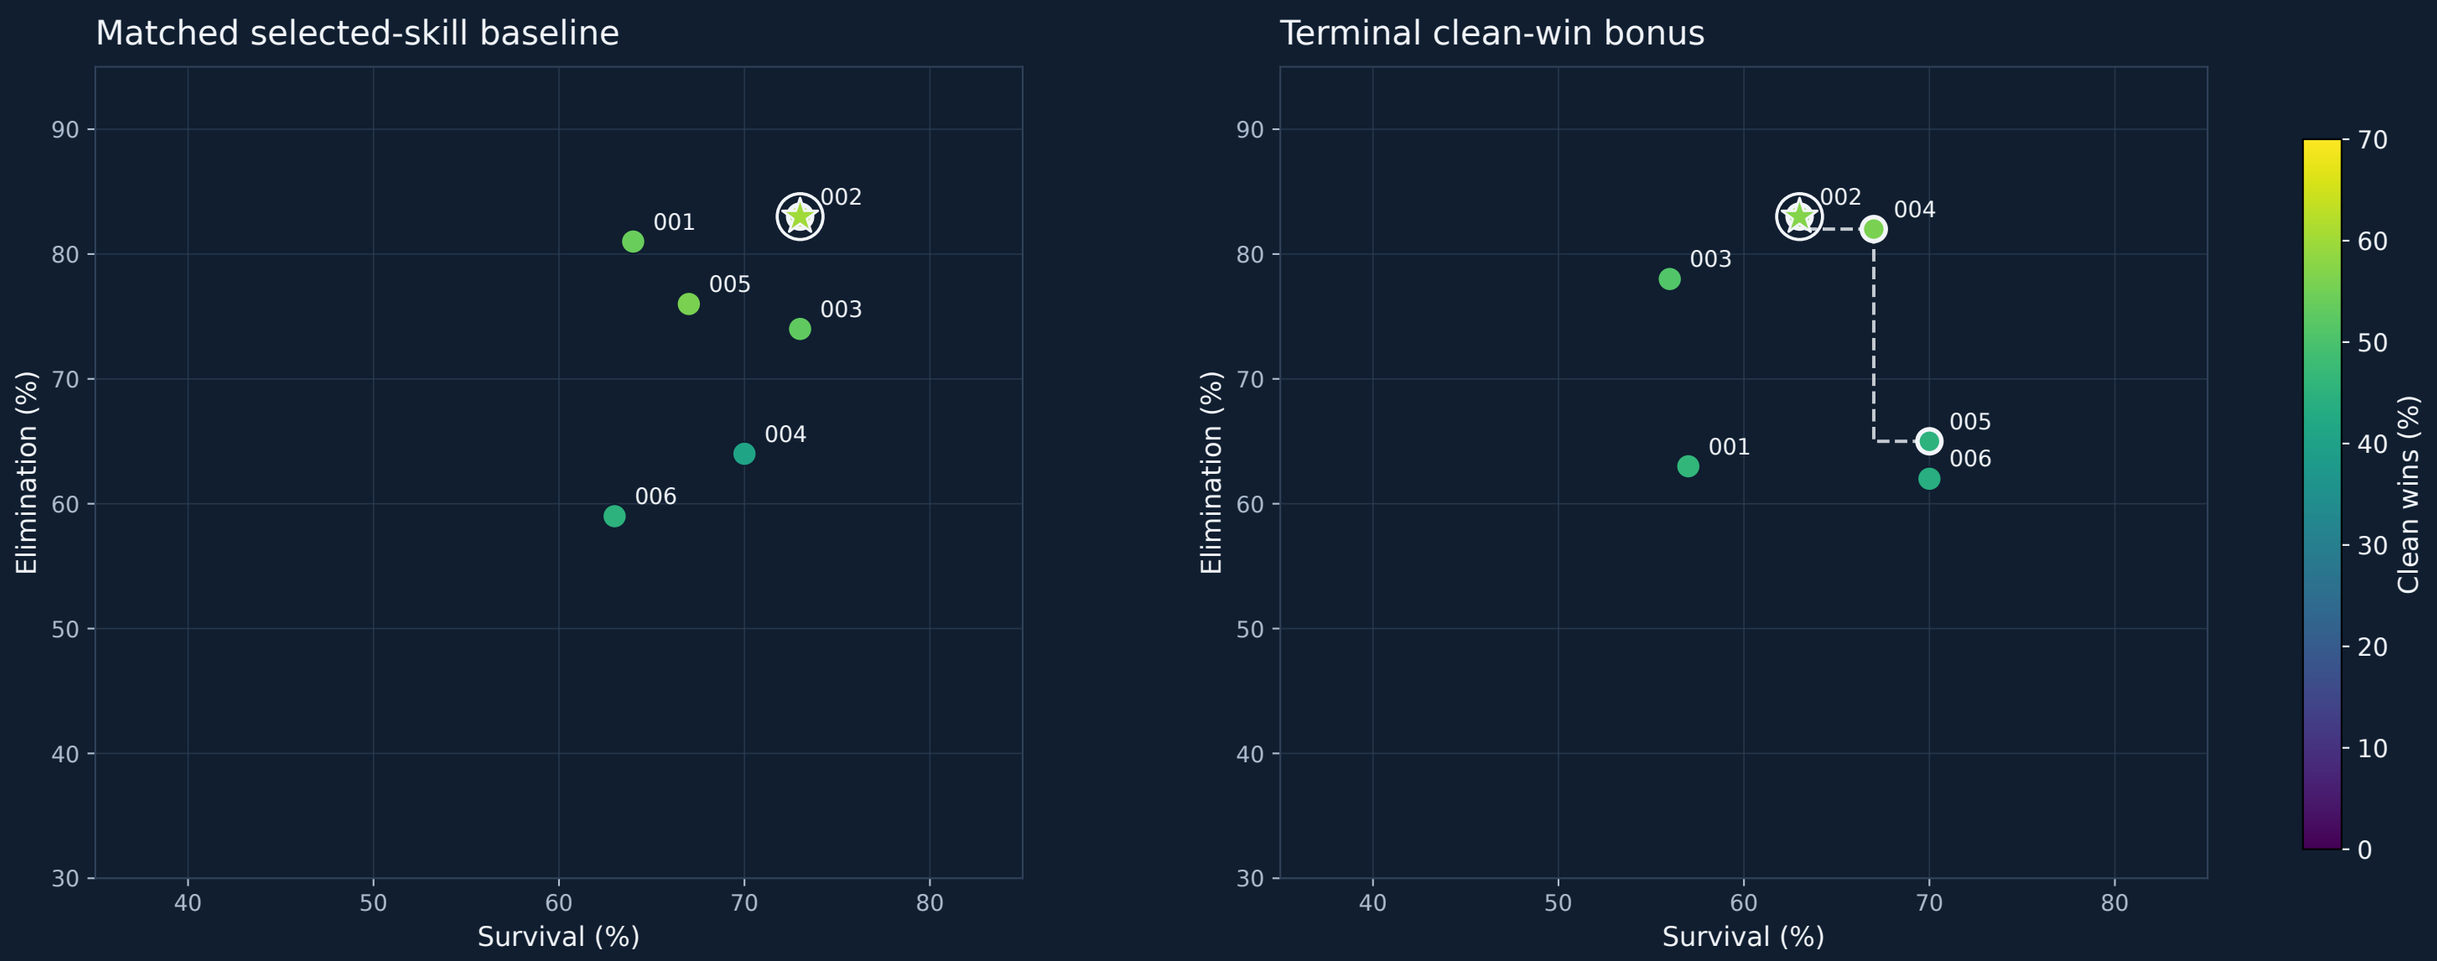
Clean-win bonus: matched six-pilot subset

Incomplete trial: only pilots 001-006 completed | Same 100 development scenarios | No inference about all ten pilots



Population composition is matched within this figure. The bonus trial is excluded from the forty-model comparison.

White rings: observed frontier | Star: highest clean-win rate | Better outcomes: upper right

Dashed steps are visual guides, not achievable intermediate policies. Axes are zoomed; use the labelled percentages.
